SUMMARY

Intermediate front-end web developer with hands-on experience building responsive, user-focused websites, including a functional replica of the YouTube homepage. Skilled in HTML, CSS, and tutoring others to develop web development proficiency. Passionate about creating visually appealing and efficient web solutions, seeking to contribute technical expertise to innovative web development projects.

EXPERIENCE

Freelance Web Development Tutor

2023 – Present, Remote

- Tutored 10+ students in HTML and CSS, creating structured lessons to teach core web development concepts.
- Developed practice projects to reinforce skills like responsive design and CSS styling.
- Provided personalized feedback, helping students debug code and improve their portfolios.
- Enhanced students' understanding of front-end best practices, resulting in 80% successfully building their own websites.

Freelance Front-End Web Developer

2022 – Present, Remote

- Designed and built multiple custom websites for small businesses and personal projects.
- Collaborated with clients to translate design mockups into functional, responsive web pages.
- Utilized HTML and CSS to create clean, modern interfaces with a focus on user experience.
- Implemented client feedback to refine designs, ensuring alignment with project goals.

PROJECT

YouTube Homepage Replica

Personal Project

- Designed and developed a fully responsive replica of the YouTube homepage using HTML and CSS.
- Implemented grid and flexbox layouts to ensure seamless display across desktop and mobile devices.
- Incorporated CSS hover effects and transitions to enhance user interactivity.
- Optimized code for performance, reducing load times through efficient styling techniques.

Gemshine Website (Beauty Products)

Personal Project

- Built a single-page website for a women's beauty products brand with a light pink theme.
- Created a responsive layout with header, three content sections, and footer using HTML and CSS.
- Applied elegant typography and hover effects to align with the brand's aesthetic.
- Ensured cross-browser compatibility and mobile responsiveness for a seamless user experience.
